

DESIGN SYSTEM · REFERENCE

Camouflage

A dark gallery where the letterforms are the art and the chrome stays quiet — one coral accent does all the pointing.

Dark-first

One accent

Borders, not shadows

Hanken Grotesk

The type is the art; the chrome is the frame.

Warm near-black walls, quiet grey chrome, and a single coral accent. The signature move is a disguise — the UI runs on one sober grotesque, and an expressive face is swapped into the spotlight. The tension: museum restraint against one warm, living accent.

Principles

- 1 Warm near-black, never pure black.** The wall is #150F0B with a faint warm hue — no cool slate, no #000.
- 2 Coral is the only chroma.** Every accent is the coral ramp. Status hues mean status, never decoration.
- 3 Chrome is grey; content is warm-white.** UI labels recede to grey so letterforms own the contrast.
- 4 Depth from material, not shadow.** A 1px border + a surface shift. The only glow is the coral hero field.
- 5 One hero face per view.** A sober grotesque holds the UI; at most one expressive display face is the spotlight.
- 6 Generous, varied rhythm.** Slow ease-out-expo entrances that enhance already-visible content.
- 7 Numbers are tabular.** Counts and indices use tabular-nums, often as quiet coral markers.

A warm wall, one coral signal.

	background #150F0B	warm near-black wall		surface1 #211A15	cards, panels
	surface2 #2A221C	hover / nested		border-visible #3A3128	intentional borders
	text1 #F6F1E9	content (warm-white)		text2 #B7AC9C	chrome / descriptions
	text3 #8C8172	faint meta		accent #EF885A	the coral — all signal
	success #5BA86A	positive status		warning #D9923C	caution status

Light mode keeps the warm tint: bg **#F6F1E9**, text1 **#211A15**, accent **#E5743F**. Derive by role, never by inverting hues.

One grotesque, a tight scale.

Hanken Grotesk holds all UI and body; an expressive face is swapped into the hero slot only.

display	Aa Display	800 · clamp→60px · -.03em
heading	Heading	700 · 30px · -.02em
subheading	Subheading	700 · 22px
body	Body — reading text in warm-white	400 · 17px · 1.55
caption	Caption · metadata	500 · 13px
label	LABEL · EYEBROW	600 · 12px · caps

Spacing · 8px base

xs / sm	4 · 8
md / lg	16 · 24
xl / 2xl	32 · 48
section	clamp(3rem,8vh,6rem)

Radii & elevation

control / chip	11px
card / panel	16px
pill / tag	999px
elevation	flat · border only

Motion

easing	cubic-bezier(.22,1,.36,1)
hover / entrance	180ms · ~550ms staggered
rule	no bounce · respect reduced-motion

Border + surface, coral for signal.

Chips & tags

Status

Cards & inputs

Invoke it by name; stack it with the others.

Installed at ~/.claude/skills/camouflage-design/. Trigger it with "Camouflage style", "Camouflage design", or /camouflage-design. It never triggers automatically.

The composition chain — broad → narrow

/camouflage-design — the identity	the look
/impeccable — the interface	layout · motion
/beautiful-type — the type	pairing · scale
/cadence — the words	human voice

Anti-patterns (the immune system)

× No pure black or cool slate · × No second accent color · × No drop-shadows for elevation · × No gradient text · × No identical icon-card grids · × More than one display face per view · × UI labels at full strength · × Bounce/elastic motion · × 14px body.
